

## **READ ME :**

## **Installation :**

Node js: <https://nodejs.org/en/download/>

## **Execution Steps :**

Extract the files from the zip file

Run the following command to install the node packages: **npm i**

Run the following command to run the server: **npm run dev**

## **Sample inputs/outputs:**

As the sorting is implemented as a website it is user friendly

If the sorting code needs to be executed, go to the algorithms folder and sort.js inside it.

Run it in VS code

Input: Array of Tamil words

Output: sorted array of Tamil words
